

Minutes of a Regular Board Meeting held by the Town Board of the Town of Riverhead held in the Riverhead Town Hall, Howell Avenue, Riverhead, New York, on Tuesday, October 4, 1994, at 7:00 p.m.

Present:

James Stark,	Councilman and Deputy Supervisor
Victor Prusinowski,	Councilman
Frank Creighton,	Councilman
Harriet Gilliam,	Councilwoman

Also Present:

Robert Kozakiewicz, Esq.	Town Attorney
Barbara Grattan,	Town Clerk

Absent:

Joseph F. Janoski,	Supervisor
--------------------	------------

Deputy Supervisor Stark called the meeting to order at 7:00 p.m. and the Pledge of Allegiance was recited.

Deputy Supervisor Stark: "I would ask the Board if they would join me down front. We have the pleasure tonight to award the Employee of the Quarter and some other little nice amenities we're going to do.

If the members of the Labor Management Committee are here, I would ask them to come up and join us. Are any of the members here? The Employee of the Quarter is an award that we give out four times a year to a recipient or employee of our staff who has demonstrated so to speak above and beyond the call of duty. It is voted on by Management and their peers, the labor so to speak of our employment, and I would ask at this time Leisa Sollazzo would come up and she'd like her family to come with her. They're embarrassed? Leisa is the sister of our former administrative aide to Supervisor Janoski and former Deputy Supervisor, Monique Gablenz, who is out in the audience (inaudible).

Anyway, we have a proclamation and some goodies for you. Leisa is now with the Engineering Department, as the Administrative Aide to

our very capable engineer, Ken Testa, and (inaudible) McCarthy, an Irish name. I would ask maybe Diane as part of the Labor Management to read this on behalf of the Labor Management Committee."

WHEREAS, it is both proper and fitting that the Town of Riverhead recognize the outstanding service of its employees; and

WHEREAS, in order to provide a mechanism to recognize these employees and at the recommendation of the Labor Management Committee the Employee of the Quarter program has been established; and

WHEREAS, Leisa Sollazzo has dedicated herself to service of this government and its citizens in the Engineering Department; and

WHEREAS, her service, courtesy and attitude has exemplified the highest ideals in the expression of her (inaudible).

NOW, THEREFORE, I, Joseph F. Janoski, as Supervisor of the Town of Riverhead do hereby proclaim October 4, 1994, as Leisa Sollazzo Day in recognition of her being named Employee of the Quarter and I call upon my fellow citizens to join with me in recognizing her service to the Town of Riverhead.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the great seal of the Town of Riverhead to be affixed this 4th day of October, in the year of Our Lord, nineteen hundred ninety four.

It is signed Joseph Janoski.

Madeline Sendlewski: "Leisa, I have for you a gift from Ken Testa and the men of the Engineering Department. I want to present you with this bouquet. I would also like to present you with a \$40 gift certificate from the (inaudible) Inn, compliments of Jerry Sawicki on Sound Avenue, Baiting Hollow. Additionally, Leisa will get a \$100 savings bond and I just want to take 30 seconds if Mr. Stark will allow me, to say."

Deputy Supervisor Stark: "Be my guest."

Madeline Sendlewski: "Thank you. That I think a lot of Leisa. I admire her greatly. She is truly an example of when you set goals in your life, you have to put your hand to the plow and that's what

she does. Because not only is she employed by the Town of Riverhead, Leisa spends long hours also working part time with us in the audience at the Birchwood Restaurant, (inaudible). And they appreciate her I know as much as we do. But Leisa has just built a home for herself and is raising her two children, Jill and Nicholas, her daughter having aspirations of becoming a doctor and her son is not here with us because he is ill today.

So, Leisa to me is an example of when you set your goals, you can achieve your goals with hard work, no complaining, and she always has a smile. Aside from the fact that she cannot stand being up here because she's very nervous, she does not want to speak. I'm going to hand her the mike just for a minute despite her objection. Can we give her a hand, please?"

Applause

Leisa Sollazzo: "Thank you very much."

Deputy Supervisor Stark: "One of my first educators besides Monique was Leisa when she worked in the Supervisor's office and she would tell me quite bluntly, you can't do that, Jim. You can't do this. You can do this. And I thank her very much and really when I call down to the Engineering Department now either on behalf of myself or the Town Board or any one of our Departments, I say Leisa, we have to get this done. And the next thing, it's done. So we all appreciate Leisa. Thank you very much."

Applause

Deputy Supervisor Stark: "I guess, when we say, confession is good for the soul. It's very heartening to find out that people do have a soul. And that people do respond to the needs of others. It's very heartening for me as a Councilman and the designated Deputy Supervisor, I guess Acting Supervisor right now in Joe's absence, to know that we have employees who feel that way out there and recognize that mistakes are made. I guess that's why my dad told me years ago, that's why we put erasers on pencils.

But when you find somebody who recognizes a mistake and it could have cost somebody their job, it could have cost a business a serious setback, it makes that mistake correctable, then I think we have a

very admirable person, a very honest person. Tonight, later on, we will settle a Stipulation of Settlement with the DEC on garbage. Our landfill. There's been a great deal of argument as to whether how we should handle our garbage. It's not a beautiful sight. It's not Polo after shave lotion. It's a tough job. But a job that we have to do. But certainly I'm sure that the DEC now appreciates that we do dump our garbage on a slab and we get a chance to look at it. Because as a result of that, one of our employees, I think, has saved a business from going under or a setback. I think one of our employees has found an opportunity to righten or straighten out a mistake that could have cost somebody a job, whose income probably might have depended upon bringing up their family and what have you.

So, I personally as a representative of the people of the Town of Riverhead and I'm sure the Town Board feels the same way, are very pleased to call upon a member of our landfill crew, Sonny O'Kula, to come up and be recognized for the accomplishments that he kind of came forth with (inaudible). I mean, certainly when you see him on CNN at six o'clock in the morning, and my daughter who lives in Hawaii working saw it on CNN, you got worldwide coverage. And there's a few politicians who would like to get that publicity such as you.

But, seriously, on behalf of myself, and I'm sure the Town Board in itself would like to have a few statements to say themselves, I personally thank you."

Applause

Deputy Supervisor Stark: "What you (inaudible) is to show the world we've got a good workforce here in Riverhead, and I thank you personally and I think right now Victor has a proclamation on behalf of the Town that he would like to read and then I'm going to ask the other two Councilmembers to express their own feelings."

Councilman Prusinowski: "Sonny, on behalf of the Town Supervisor, Joe Janoski, and the Board members, I would like to present you with a certificate of merit."

WHEREAS, it is proper that the Town of Riverhead acknowledge the outstanding dedication of its employees who exhibit acts of honesty; and

WHEREAS, the Town of Riverhead is especially proud of Walter Sonny O'Kula who during the course of his workday, found a large deposit of funds and being concerned that another employee might be held accountable for the loss, turned the monies over to his superintendent; and

WHEREAS, the Town of Riverhead hereby applauds the dedication of Walter Sonny O'Kula for his sense of caring, dedication and loyalty and honesty as an employee of the Town of Riverhead.

NOW, THEREFORE, I, Joseph F. Janoski, as Supervisor of the Town of Riverhead do hereby award this Certificate of Merit to Walter Sonny O'Kula in recognition of his honesty, loyalty and dedication and do hereby call upon the citizens of the Town in honoring Walter Sonny O'Kula as a truly dedicated civil servant.

Sonny, I want to thank you on behalf of your Superintendent, John Reeve, who could not be here tonight. I know all the fellow employees you work with in the landfill are proud of you. I'm proud of you. Honesty does pay. I know you've received some recognition and some reward and it's just to you, and I think that it's a good message sent out that little acts of honesty should be rewarded and I know we're going to do other things for you, too, and thank you very much and it's a reflection on the type of workforce we have throughout the Town of Riverhead. I'm sure proud of you. Thank you very much."

Applause

Councilman Creighton: "Sonny, some of us, labor day in and day out to try to bring favorable publicity and credit to the Town of Riverhead. And in one simple, honest act you brought more favorable publicity, positive publicity, to the Town of Riverhead and more credit to our Town than all of our laborers put together. Thank you very much."

Applause

Councilwoman Gilliam: "Sonny, congratulations and I, too, would like to thank you for being an outstanding example of what a civil servant is truly supposed to be about. A person of character, a person of integrity, a person who goes about quietly but deliberately

doing their job in a professional manner. And you've exemplified all of that and your most recent act of finding this lost money and the way that you've handled all the publicity and everything, you've remained yourself throughout this and I thank you for that and you give us all a sense of hope and people-- that people can still be honest and still do the right thing. So I thank you."

Applause

Deputy Supervisor Stark: "If anybody wants to contact Sonny's agent, he's right outside."

Okay. We have a little gift from the Labor/Management that would like to get in."

Labor/Management (unidentified): "Sonny, we just like to thank you. We deeply appreciate what you've done. Please accept a gift certificate, compliments of (inaudible) at Digger O'Dells, and go enjoy a nice dinner. Thank you very, very much."

Applause

Deputy Supervisor Stark: "We're not going to let you go quite that quickly. I'm sure that you have your family out here. Maybe you would like to point them out and just introduce them for us. I know they'll stand right up."

Sonny O'Kula: "This is my wife, Barbara. (Sonny introduced his family)."

Deputy Supervisor Stark: "Also, just as an added little benefit, Sonny. Before you go too far because I know you've been called on the circuit, the Board has authorized me to give you, it's not a lot, but a three day pass and you can use them any days you want. They're excused absences. If you want to take a long weekend, it's on us."

Applause

Deputy Supervisor Stark: "Thank you. If that's all right with you, Jack."

Okay, is there a motion to approve the minutes of the Regular

Town Board Meeting of September 20th?"

Councilwoman Gilliam: "So moved."

Councilman Creighton: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Stark, yes; Prusinowski, yes. 4 yes to pass.

Deputy Supervisor Stark: "Is there a motion to approve the minutes of the Special Town Board Meeting of September 22nd?"

Councilman Prusinowski: "So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, abstain; Prusinowski, yes; Stark, yes. Special Board meeting minutes are passed.

Riverhead Community Church Service

Will be holding its second annual Riverhead Community service on

Saturday, October 8, 1994 at 6:00
p.m. at the First Congregational
Church of Riverhead on Main Street

Deputy Supervisor Stark: "Thank you. At this particular time, I would like to call before we start the Public Hearings, I would like to call out of order Resolution 716. Councilman Prusinowski."

Councilman Prusinowski: "Authorizes Supervisor and special counsel to execute stipulation of settlement."

WHEREAS, the Town of Riverhead simultaneously in conjunction with the Towns of Southold and East Hampton, has reached a settlement with the New York State Department of Environmental Conservation of all pending litigation and all outstanding administrative enforcement proceedings with respect to Youngs Avenue landfill, including all other potential operation violations that could have been asserted with respect to the Town landfill.

NOW, THEREFORE, BE IT RESOLVED, that the Supervisor and special counsel are hereby authorized to execute the stipulation of settlement and attachments hereto on behalf of the Town of Riverhead, which stipulation shall be in the form and substance as annexed hereto and incorporated herein by reference.

So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded. Any discussion?"

Councilman Creighton: "Yes. This seems to refer to the stipulation as being included and I would suggest that we include the stipulation as an addendum to this Resolution so it's a matter of record."

Councilman Prusinowski: "Yes. Okay. We have the official copy there that's being signed which has the corrections in it, Frank, that we discussed today in Executive session on the monitoring situation. In fact, if you could just bring up our Town of Riverhead copy. Thank you."

Councilman Creighton: "I think it's referred to in the Resolution already so it doesn't need to be amended or anything."

Councilman Prusinowski: "Right. Right. Well, we have-- it's right here."

Deputy Supervisor Stark: "You just want to have that on the record?"

Councilman Prusinowski: "Right."

Deputy Supervisor Stark: "Or-- ."

Councilman Creighton: "It's referred to as an annex in the Resolution, but it's not in the packet."

Deputy Supervisor Stark: "Okay, then we'll add it to the packet."

Councilman Creighton: "Yes. That's all, right."

Councilman Prusinowski: "I'm sure the press is going to want a copy of it after-- "

Deputy Supervisor Stark: "All right. I will-- is there any other discussion on this?"

Councilman Creighton: "No."

Deputy Supervisor Stark: "Call the roll, please."

The Vote: Gilliam?

Councilwoman Gilliam: "I vote yes on this Resolution which I think is a very important day in the Town of Riverhead with regard to addressing our solid waste issue. This stipulation is more than just a settlement, it's also providing a mechanism for ensuring that there will be some much needed and necessary work done in terms of evaluating composting, looking at the use of pesticides and testing in the area, and all of these issues will benefit the eastern end of Long Island and ensure that we continue to have agriculture as a very necessary part of our economy. And, certainly, Governor Cuomo recognized that it was important to have these added features to the settlement

proposal and the DEC and I think it's a hallmark decision, an action taken-- showing the partnership between the Governor's office, the DEC, our attorneys who worked very hard on negotiating this and the Town government. So I vote yes."

The Vote (Cont'd.): Creighton?

Councilman Creighton: "I think it's helpful that this is an election year and it's a tough election for the Governor and I'm very pleased that this stipulation has been agreed to and I vote yes."

The Vote (Cont'd.): Councilman Prusinowski?

Councilman Prusinowski: "Some of the highlights will be in addition to reducing the civil penalty down to \$25,000, the money as Councilwoman Gilliam indicated will go to east end environmental projects of which each Town will have a chance to send up to 30 River-head residents to a camp that will be run by the State University of Stony Brook.

Also, there will be available to the Town low interest loans-- no interest loans up to \$4,000,000 to help cap the landfill; a \$2,000,000 grant; up to \$5,000,000 in cap reduction costs which our original estimate of capping and closing our landfill was approximately \$14,000,000 to \$16,000,000. With this agreement, we've reduced it well under \$5,000,000.

I want to thank some people who helped us and I mean us meaning the three east end towns who came to our rescue in the eleventh hour of negotiation. Assemblyman Steve Englebright from the western part of the county was-- signed a letter of support. Assemblyman Bill Bianchi. These are Assembly people who are not from our District but in the eleventh hour we needed support. Pat Acampora, Assemblywoman in our own District. Assemblyman John Behan, Supervisor Pat Vecchio from Smithtown and Supervisor Frank Petrone, they signed letters in support of our position that fine money should be used for each individual Town.

I want to especially thank the law firm of Twomey, Latham and Shea. They-- we hired them to-- on behalf of the three Towns to help us. The firm of Smith, Finkelstein, especially Frank Isler who helped negotiate this deal. Our engineering group, the McGuire Group,

because all three town consulting engineers had a constant healthy discussion with the DEC technical staff. Nobody likes to pay anything on a situation like this. I believe that it's a fair deal for the taxpayers-- it's a good deal for the taxpayers. I thank the Department of Environmental Conservation for seeing the reasonableness of our position in the end.

I believe that our battle, our fight that we went into Court with in 1990 was justified. It was based on some principles of law and although we did not prevail in the courts, I want to assure the taxpayers that this will now clear the decks, we'll move forward and with our solutions that we have in place for garbage, we're in excellent shape in this town. Again, we have the lowest cost of anybody in Suffolk County for our disposal of our solid waste. And, again, the Governor's office was helpful and I just wanted to mention all those people, and I vote yes."

The Vote (Cont'd.): Deputy Supervisor Stark?

Deputy Supervisor Stark: "I feel like I've been baptized. Baptism in the Catholic church is we wash away all the sins. This is exactly what this stipulation of agreement does. It is washed away what is considered sins. Three years ago we set out on a course which I feel that the east end truly felt that they were correct that our landfills were, in fact, legal according to the 208 water study which the landfill law was based on.

Rural landfills need not be closed. We don't have the industrial waste. Winning is not everything, it's the only thing. In this particular case, I think we have won. I think we have repositioned ourselves with the state, the state DEC. I think we have made our points that, in fact, there are environmental problems in Suffolk County. I think we have made our point that we are willing to do our fair share in preserving our water supplies and our environment, our estuaries, our rivers, our streams, and what have you.

Our main point is that the monies that we will pay out over the next seven years will be kept locally and glad to see that most of the money is going to our East End Institute which then in turn will benefit Cornell Extension Service and Research which we have been struggling for the last year and a half to keep locally here in Town.

We are the agricultural community of Long Island. It used to stretch all the way down to 106, Nassau County. It no longer is down there, only a pittance. Most of the agriculture is out here, it's no longer in potatoes. It's in sod, it's in shrubbery, it's in wine, it's in cauliflower and what have you. That is part of our tourism. So in order for us to maintain that tourism attraction-- and turkey farms and duck farms. And what have you. All of that is part of what makes us unique and I'm very happy that, in fact, we've come to this conclusion. We've been bathed, we've been baptized, and now we can get off on the right foot again. I think we're on the same playing level now. We have an opportunity to move forward with clear conscience. And I wholeheartedly support this settlement and I vote yes."

Councilman Prusinowski: "Jim, I just want to point out one thing to the taxpayers. Because of the way we've organized our collection system here in Riverhead based on a residential tax which is the lowest in Suffolk County, and collection fees up at the landfill, we are in the black in our landfill budget. We will be able to pay these monies out without borrowing any money whatsoever, thus saving further interest.

Unfortunately, some of our sister towns have to go out and borrow heavily to fund this arrangement. The Town of Riverhead does not have to go out and borrow a penny. We're in good shape. Our engineering fees and any surplus that we collect up on our transfer station, will be applied to the capping cost and anybody knows paying a mortgage, or loans, you know, you save a lot of money when you don't have to pay interest and borrow the money. So I just wanted to point that out."

Barbara Grattan: The Resolution is adopted."

Deputy Supervisor Stark: "With that, I will call a five minute recess."

Meeting recessed: 7:35 p.m.

Meeting reopened: 7:40 p.m.

Deputy Supervisor Stark: "Let the record show that the hour of 7:40

has arrived and the meeting will come back to order. Will the Clerk please read the public notice of a Public Hearing that was scheduled for 7:05."

Barbara Grattan: "I have affidavits of publishing and posting of a Public Hearing to be held at Riverhead Town Hall, Riverhead, New York, at 7:05 p.m. on Tuesday, October 4, 1994, to hear all interested persons who wish to be heard regarding the amendment to Chapter 101 Vehicles and Traffic, Article III, Traffic Regulations at Section 101-3, Stop and Yield Intersections, Railroad Crossings, Parking Fields. Intersection is Sylvan Drive. Stop sign on North Wading River Road entrance from east to west."

Deputy Supervisor Stark: "Is there anybody at this particular time that would like to comment on this particular Public Hearing? I know Chief Grattan is here somewhere. Chief, would you like to make a comment on this particular-- ? If you want a copy of (inaudible)?"

Chief Grattan: "Let me just see that. Joseph Grattan, Police Chief of Riverhead. Okay. There's been a request for a stop sign on North Wading River Road which, if erected, would control traffic in an east and westbound direction. I went up there and checked it out for the past several days and also had one of my Lieutenants go there."

It reveals up there that there's about 13 intersections on North Wading River Road which in length is about two and a half miles, a little bit more or less. So, it's conceivable that if everybody wanted the same thing, we could wind up with 12 or 13 stop signs in a two and a half mile area which would be ludicrous to say the least.

I believe what the problem probably is, two things. When people are exiting from Sylvan Drive, cars approach at a high rate of speed or what is perceived to be a high rate of speed. The Department of Transportation which is really the umbrella group which controls traffic flow in the State of New York are very clear in that stop signs are not to be utilized to control speed. That's our job as the police department and which we'll do.

The Building Inspector also-- not the Building Inspector, excuse me, the Ordinance Inspector, also helped me out by going up and checking the area and he has sited adjacent landowners for certain

violations that obstruct view. I think if that's cleared up, and he's also, one other thing the Highway Superintendent has been asked to do some grading. If those things are done, I think that will correct the situation to the satisfaction of these people. Along with that and speed enforcement, I don't see the need for a stop sign."

Deputy Supervisor Stark: "I need that back, if you would. Thank you, Chief. Is there anybody else who would like to make comment on this?"

For the purpose of the record, I have correspondence from the Highway Superintendent, Charlie Bloss, and I would read into the record.

Dear Councilpeople: North Wading River Road is a winding two lane road that has a posted 30 mile an hour speed zone and serves as a major collector road for all of the northern part of Wading River. The installation of stop signs would interrupt the orderly flow of traffic and possibly create a hazard due to the limited sight distances created by both the existing horizontal and vertical alignment of the road.

The existing stop sign on Sylvan Drive would be a sufficient traffic control device provided that the corners at this section were opened up for better visibility, which the Chief referred to. Visibility is presently being blocked by a brick wall on one side and shrubs and evergreens planted by the owners of both corner lots. The enforcement of Riverhead Town Code #108-68, Visibility at Intersections, should correct this problem.

Charlie Bloss.

I also have a memorandum from Richard Gadzinski, our Code Enforcement, and I would submit those to the Clerk for part of the record tonight because those people could not be here. And, again, I would recognize anybody in the audience that would like to speak on this. If not, yes, Bill?"

William Kasperovich: "William Kasperovich from Wading River. I'm surprised that the people from-- that live in the development of Sylvan Drive are not here this evening. I think it's important that a bit of history be brought to light at this point in time. The Sylvan

Drive development wanted to be somewhat exclusive, and I'm going back now to the '40's and 50's. The only access to this development is at this intersection that we are now speaking of. This is the only way that the people that live in that area can get out of the area. Consequently they have to use it regularly every day.

The difficulty which existed from the day it started was that it is on a curve and it's on-- the terrain is not level. The line of sight is not good and the danger is not seeing the cars come out of the drive without a cautious approach. People like to move in and out freely. This cannot be done. But the-- having another exit for this area or entrance is a choice of the developer. And the Town has not done anything to try to change this.

There were several opportunities that came up where they could have extended some item one way or the other and make another access to this development. I think the flow of North Country Road should remain 30 miles an hour without interruption, but the manner that the people come in and out, especially coming out of this development, should be given a better line of sight and caution and traffic problem signs should be posted. Because visibility is not good.

Now, I don't know if this brings in any considerations, but it's a good example of bad development and not correcting things when they come to light. And this is a good example. I think the line of sight and signs are-- when corrected and improved, definitely improved, this could be tolerated. It will never be a good condition. Thank you."

Deputy Supervisor Stark: "Thank you, Bill. Anybody else who would like to speak on this particular subject at this time? If not, I declare the Hearing closed."

Public Hearing closed: 7:55 p.m.

Public Hearing opened: 7:55 p.m.

Deputy Supervisor Stark: "If there's no objection of the Board, being that the time is 7:55, I would call the 7:15 Public Hearing right now. Let the record show that the time is 7:55 p.m. Would the Clerk please read the notice of Public Hearing.

We will come back to the 7:10 Public Hearing. This is a short one. We'll get it out of the way."

Barbara Grattan: "I have affidavits of publishing and posting of a Public Hearing to be held at Riverhead Town Hall, Riverhead, New York, at 7:15 p.m. on Tuesday, October 4, 1994, to hear all interested persons who wish to be heard regarding the increase and improvements of the facilities of the Riverhead Water District regarding rehabilitation and painting of Route 58 water tank."

Dennis Kelleher: "Good evening. My name is Dennis Kelleher from H2M. We are the consultants for the Riverhead Water District. It was back in June of this year that a Public Hearing was held in front of this Town Board for the repainting of the tank. At that time we had estimated the construction cost at \$255,000, with a total project cost of \$308,000. Bids were originally received in August of this year. We only had two bidders. The low bid price was \$409,000.

After reviewing the bids, we recommended the rejection of all bids because we felt they were not reasonable. One of the problems that we saw was the Suffolk County Water Authority and nearby water supplier had bid three tanks for repainting the week before, so we felt there just wasn't sufficient time.

We were asked to rebid the project. We made minor changes to the design plus we made an addition for alternative painting system. Bids were received on September 8th, and the low construction cost was \$338,000 for the typical painting system, and \$280,000 for the alternative painting system.

The alternative painting system-- the normal painting system or the typical one, was an epoxy paint on the outside. However, we looked at this alternative painting system that has been used on Long Island for the last four or five years where it's more of a rubberized paint. The advantage of this is you do not have to sandblast the entire tank so you save a tremendous amount of money sandblasting. But the paint itself, the rubberized paint, is more expensive. This paint has been used by the Village of Freeport, Glen Cove, the New York Water Service and Jamaica Water. So there's approximately five or six tanks that have used this.

After researching it, we recommend that the Town Board approve

going ahead with the alternative paint at \$280,000. This would bring the new project cost to a total of \$348,000. So what we are requesting for this Hearing is to increase the total project cost from \$308,000 from the original Hearing back in June, to \$248,000-- excuse me, \$348,000, for a total increase of \$40,000."

Deputy Supervisor Stark: "Is there anybody that would like to ask a question, or comment?"

Dennis Kelleher: "One more thing. These funds will be coming from the existing budget."

Deputy Supervisor Stark: "Gary, do you have anything you would like to add to this, being that you are Superintendent of Water?"

Gary Pendzick: "Good evening. My name is Gary Pendzick, Superintendent of Riverhead Water. One of the things and I see a lot of people shaking their heads, is about the cost of painting a water tank. When you see this painted this coming fall, you'll understand why it's become so expensive to do an outside structure like that."

The contractors are literally going to enclose it in a sealed garage made out of plastic with an umbrella outrigging because of current DEC and EPA regulations regulating air quality, dust and VOC's. This has made the painting of structures like water towers and whatnot incredibly expensive over the last-- just the last few years, four or five years. And it's one of the reasons why we're talking about hundreds of thousands of dollars to paint the water tower."

Councilman Prusinowski: "Who are those agencies again?"

Gary Pendzick: "That would be the federal EPA and the New York State DEC."

Councilman Prusinowski: "And these are new requirements?"

Gary Pendzick: "These are new concerning fresh air, air quality enactments to protect the surrounding environment and the people in the neighborhoods."

Deputy Supervisor Stark: "Maybe a simple example would be, Gary, if anybody has been over around Sunrise this past summer, they have

been painting the bridges, where they actually encompass the entire bridge to eliminate-- "

Gary Pendzick: "That's right. They have to put up monitors. They have to have positive air flow so nothing escapes the work areas."

Deputy Supervisor Stark: "Almost like vacuum machines."

Gary Pendzick: "That's right. It's-- in other words, air sucked in through an envelope so that nothing can escape from the workplace and then the air goes out through filters-- trapped in filters. And then they have to erect monitors around the work site and they have to be-- the fact that nothing has escaped from that work site. They're actually, (inaudible) sealing an entire water tower and when it's done, they'll unveil it one day and it will be a completed, freshly painted water tank.

But, it's very expensive to do with the current standards."

Deputy Supervisor Stark: "Is there anybody-- yes, George. Make it brief, please."

George Schmelzer: "Why bother to paint the darn thing. Leave it as it is. It isn't rusty."

Deputy Supervisor Stark: "All right. I'll have that question answered. Gary, would you tell George why we have to paint it?"

Gary Pendzick: "Well, first off, we have to keep up the proper maintenance on any of our facilities. As it rusts, the structure weakens. But, also, the interior is going to be done as well and it's due to have some improvements with respect to structure. There's a riser inside. In the course of doing these modernizations-- this modernization, it would make it necessary to also paint it and bring it up to snuff so we can get "x" amount of more years. This tank has to run-- has to last Riverhead many, many more years. We don't want it to fall down on us."

George Schmelzer: "What did it cost new?"

Gary Pendzick: "Brand new in 1967, this tank cost \$590,000 to construct."

George Schmelzer: "-- Should buy throw away tanks. You wouldn't have to paint them."

Deputy Supervisor Stark: "Very good, George. Thank you."

George Schmelzer: "Yes."

Deputy Supervisor Stark: "Is there anybody else who would like to make a comment on this? Steve?"

Steve Haizlip: "Steve Haizlip of Calverton. I don't want my comments to be misconstrued, but maybe Gary can answer what's on my mind. If we're going to close this all in and make a big envelope to keep the fumes of the paint from getting out and dust and particles, what about them guys inside that cocoon that's painting it? How are they protected? I'd like to get that answer."

Councilman Prusinowski: "They wear masks."

Gary Pendzick: "They will have to wear special breathing apparatus. Under the OSHA regulations, the workers are also protected."

Deputy Supervisor Stark: "Thank you. Anybody else who would like to make a comment on this? If not, I declare the meeting-- the Public Hearing, closed."

Public Hearing closed: 8:05 p.m.

Public Hearing opened: 8:95 p.m.

Deputy Supervisor Stark: "Would the Clerk-- let the record show that the time is 8:05. Would you please read the notice of Public Hearing for the 7:10 Public Hearing."

Barbara Grattan: "I have affidavits of publishing and posting of a Public Hearing to be held at Riverhead Town Hall, Riverhead, New York, at 7:10 p.m. on Tuesday, October 4, 1994, to hear all interested persons who wish to be heard regarding the special permit petition of East End Recycling and Composting Co. to amend a previous special

permit in order to allow for the composting of liquid wastes at an approved compost facility located at Route 25, Calverton."

Deputy Supervisor Stark: "John, would you like to make a comment right now? John, just give your name and who you are and what have you for the record, please."

John Cameron: "Good evening. My name is John Cameron. I'm the President of East End, Inc., the general partner for East End Recycling & Composting Co. Good evening members of the Town Board, members of the audience."

Alice Graff: (inaudible)

Deputy Supervisor Stark: "Alice. Please. We've got a long Public Hearing here and I need to get it done. We've got a lot more work to be done tonight. And he's too young for you."

John Cameron: "My wife would agree. If I can give some background, first of all, on the project and a little history so that I think it would benefit the public as well as the Town Board which has been actively involved over the past number of years on the development of our project, and I would like to share some of that information with the general public.

First of all, we've developed this project on Middle Country Road as a state of the art recycling composting facility which will serve as a model to industry, as an asset to the Town and Long Island and as a good neighbor to the local surrounding community.

The plant which we are developing is a plant which recycles organic waste material into usable soil (inaudible). We have employed a technology and selected a technology which frankly is second to none. It's a German technology which is actively in operation in numerous facilities around the world. The technology which we have selected incorporates the most active stabilization process of any technology available in the world today. It incorporates high degrees of agitation, turning, moisture, temperature, and aeration control. It also contains the longest active cycle approximately 10 weeks, of any cycle available and any process available in the world today.

Our facility is fully enclosed. It's a fully enclosed facility

with all receipt, processing, composting and storage of material done indoors. We also have a state of the art air handling and odor control technology. We have no stack emissions from the facility. There's no incineration of materials that's at the site and we also have no discharge of processed water to the ground or the surrounding community.

The facility is frankly environmentally superior to any facility around today, and will also produce the highest quality compost. The special permit modification which we have requested involves the acceptance of treated dewatered biosolids or sludge material from wastewater treatment facilities. This material would be a treated material and would not be a raw sludge cake and would-- does not involve liquid waste as was discussed and improperly attributed to the facility. No liquid waste would be treated at the facility.

People ask me why would you want to treat biosolids at the facility? Well, frankly, biosolids or sludge, biosolids is another name for sludge. I guess in the past few years has become a more commonly used term for sludge material. It's the residue from waste water treatment facilities. The biosolids, frankly, are included as part of our contract with the Town of Riverhead, which we have with the Town. We have a waste service agreement-- a long term solid waste agreement with the Town of Riverhead for 10 years and two optional five year renewal periods and one of the elements of waste which we have to handle under that agreement is for sludge material assuming our facility were permitted to take that material. So that's one reason why we would want to treat it at the facility.

Secondly, frankly, sludge or biosolids or organic waste material -- they're organic materials and our facility is a recycling facility of organic materials. It is absolutely consistent with the process we have developed and we have incorporated at the facility. So it's a natural product and we have a natural process which would convert this sludge like material into soil amendments. Sludge is actually a natural product which would be recycled in our composting process.

There are also benefits to utilizing the sludge in the process. It adds valuable nutrients and also trace minerals in the composting process. The sludge or biosolids also in the cake form, still contains approximately 80% moisture and that 80% moisture can supplant moisture requirements we would have as part of our composting process. So our requirements for additional water would be mitigated by the

addition of this sludge or biosolids material.

This sludge also does make for a better compost product because of the nutrient levels and the humus like consistency of it. It actually does make for a better product.

The availability of our site for handling these materials reduces the cost (inaudible) to the Town of Riverhead and provides long term Long Island base solution for its sludge material. I don't know how many of you are aware but the Town of Riverhead shares a wastewater treatment facility with the Town of Southampton and that facility generates wastewater sludge as part of its normal wastewater treatment process.

We all contribute to that problem and our facility is a Long Island based solution which can, frankly, provide economic stability for the Town for long term disposal of that material. Right now, the Town's sludge is hauled in a liquid form approximately 10 times the volume, at least five to 10 times the volume of what it would be in the cake form down to Babylon to the County's Bergin Point treatment plant where there it is dewatered and then incinerated. That's costly to the Town as well as to other East End communities which are performing similar operations.

As you are well aware, and the Board discussed earlier a settlement with the DEC. The landfills are closing and material has to go somewhere. And the Bergin Point plant which handles the majority of solids treated all-- on Long Island, in particular Suffolk County, has capacity limitations not only at its incinerator, but also just in its wastewater treatment process. And as part of that process, the County winds up restricting the amount of sludge deliveries and cesspool deliveries. They want it coming in in similar trucks, in the liquid form to Bergin Point, restricts them on a regular basis in particular in the summertime. And it's a frequent occurrence that the County shuts the door on these cesspool trucks and the small treatment plants and their sludges and they basically have to go and try the next day, try and get back the next day.

If the County's capability for handling these solids is not increased, prospects are not good for on Island solutions and, frankly, some of this material is going to have to be hauled out of state. And I don't know how many of you read in the paper last week, in Newsday,

but they pointed out that there was just a bill introduced in Congress, frankly, one that passed in the House of Representatives by a measure of approximately 386 to 58 to enable states to restrict the importation of waste from other states. We all know that it's coming. Other states don't want our problems. The Town of Riverhead has embraced solving its problem locally, unlike a lot of other communities and, frankly, Congress is now stepping forward and subsequent to the House's action, it is anticipated that the Senate will pass a bill that will enable states to restrict the importation of waste from different states.

So, on Island solutions are going to be at a premium and, frankly, we can provide part of that solution for an existing problem on the East End of Long Island. So that's another major reason why our facility can benefit-- and can provide benefit to the community for handling that material.

Frankly, we also believe from a philosophical standpoint that the organic waste products from the wastewater treatment plants if you saw them, they're basically-- their material which can easily be recycled. We don't believe it should be incinerated and just converted into carbon dioxide and ultimately contributing to greater greenhouse problems for our environment, nor should they be landfilled and just adding leachate to a landfill.

Organic solids or biosolids can easily be converted into compost product and we believe strongly that it should be done that way. There are two facilities on Long Island that presently compost their sewage sludge and we permitted, designed and managed both facilities. Both in operation in Nassau County in residential areas. Both in operation totaling a little over 10 years in operation. Neither one with a note of complaint and both facilities producing class one compost which is being utilized on the local golf courses, distributed to local landscapers. In fact, it's also been used at the Brooklyn Botanical Gardens.

It's a process which works and if it works well, if it's engineered properly, designed properly and operated properly, like anything in the handling of waste, if it's not done right, it can be a problem. And, frankly, what we've spent a lot of time and money on is why we're still here. We've, as many of you know, been at this for a number of years waiting for the Town to sign up so we can build

our facility. We didn't sell this plant on doing on the cheap because we didn't want to compromise the money we have in here for process control and state of the art odor control. We could have built this facility four years ago if we were willing to take tip fees \$20 less than what we're taking now.

The Town of Riverhead stood by us and they recognized that we're out here to solve a problem and we believe that biosolids or sludge is just another natural product which can add to the processing we could easily solve. Okay.

Questions were asked why we were submitting for the permit application now and why didn't we do it in the very beginning. We've submitted for the permit modification because, frankly, we've just completed extensive analysis at our Calverton site where for the past two plus years, we evaluated the viability of growing commercial sod in commercially developed compost. That involved composting shipped up from Florida as well as co-compost which was solid waste compost with sludge compost. And we grew that on the back three acres in the back of our site and after two years and, frankly, an open book analysis of that project, we had team members comprised of the Suffolk County Department of Health Services, New York State Department of Environmental Conservation, Cornell Cooperative Extension, the Cornell University Department of Agriculture, as well as ourselves and the State University of New York at Stony Brook, the Waste Institute as well as a local sod grower who operated the project.

After two plus years and extensive groundwater analysis and analytical work, the project has proved that the compost would have no adverse environmental impact upon groundwaters which, as you know, on Long Island we're groundwater sensitive because we derive all our drinking water from the ground. We prior to submitting or even asking to be considered this project for handling the sludge, we wanted to demonstrate to the regulatory agencies as well as to the Town that this product would be safe and utilized on Long Island. And it was an open book and the data substantiates it and if anybody is interested in that data, we'd be happy to share it with you. But we waited for that data to become available.

The second reason why we waited until recently to submit for the permit modification is that as you may have been reading, we're getting close with consummating other waste service agreements with other

towns for joining into our project in conjunction with the Town of Riverhead. And, frankly, those contracts are coming to a close and we are now in final stages of finalizing revised design and if we were going to incorporate biosolids or sludge into the process now is the time to do it prior to getting the facility constructed and adding it later on if that was the issue. So we felt it was the most cost effective to add it at this time-- consider it at this time.

It's-- where we are in the present status, apparently there has been some misinformation which has been conveyed regarding the project and the process involving the sludge material. Again, we're not handling any liquid waste, there is no discharge. There never has been in our permitting process. Our permit specifically excludes the discharge of any wastewater from our facility at all onto the grass. So there is no discharge. But apparently there's been some inaccuracies which have been represented regarding this application.

We want-- I want to take responsibility as president of the company for and apologize to the community for not having fully apprised you of this issue. We spent-- prior to getting the initial permit we spent months and months meeting with all the civic groups in the surrounding community to bring you up to date and apprise you on the process. Unfortunately on this issue regarding the biosolids that same level of effort was not exerted and I'll take responsibility for that and I want to apologize because the Public Hearing is not the time for the local community to receive the information regarding this. We actually didn't think it would be as much of an issue and obviously it is, and I apologize to you for that. You have every right to all the information to allay any of the concerns you may have. So please accept my sincere apology on that.

As I stated earlier not only do we want to be a model for the industry and an asset to the Town, we want to be a good neighbor. We want to be a good neighbor and we will be a good neighbor. And we will demonstrate that to the local community as well as to the Town. I think the Town Board knows that we have been responsive throughout the process in addressing their concerns as well as the local community. But in that vein what I would like to convey to you is I'd like to show the community and the Town our act of good faith and demonstrate to you that as good neighbors that we will at this time withdraw our application for the treatment of biosolids and for the application for a special use permit until such time as the community can feel

comfortable that we have demonstrated what kind of neighbors we are and that the quality project that this is going to be and we will prove that to the community and to the Town. Until such time, we wish to withdraw the application. Thank you."

Deputy Supervisor Stark: "Thank you, John. In essence, what you're going to do is go back to the general community and sit down and communicate with them."

John Cameron: "We think there's substantial reason for considering this to be included in-- the waste solids to be included at the facility but what we'd like to do is we'd rather have the community apprised and I'd be happy to meet with them and have my staff meet with them any time they would like to go through the data. We can show them results from existing composting operations on Long Island as well as to review analytical data and basically get people comfortable and if people aren't comfortable and-- we don't represent ourselves or don't sell our case, then I wouldn't expect to ask you to consider the application."

Deputy Supervisor Stark: "Very good. Appreciate that. George, is there anybody at this particular time that might have a question of John prior to the closing of this particular Public Hearing? They are withdrawing this application at this particular time and will reach out to the community to explain this process so that the community can feel comfortable. Ann?"

Ann Miloski: "My name is Ann Miloski. I'm a resident of Calverton and also president of the Greater Calverton Civic Association. I'm very glad to hear Mr. Cameron say that he's withdrawing his application and that he wants to be a good neighbor. But also at this time because of your application permit that you just brought in, I had time to read your compost report and I had some questions about that and also your original application was from 1990, and since 1990 a lot of things have changed."

In fact, on here I have my concerns and the residents concerns on some of the questions that we asked in 1990 and how they were answered and a lot of them are different today. One of them, Mr. Cameron, your people have found the (inaudible) on the site that's contaminated by trichlorethane and that was in one of your test wells and it was found and it was exceeding the drinking water standards.

You told us that this is due to contamination caused on the Grumman site but it's been transferred onto the property that you are about to work on. In the groundwater. So actually that site is also contaminated and something should be done about that, correct?

Well, anyway, I'm not supposed to be asking you questions."

Deputy Supervisor Stark: "You are supposed to be talking to that mike."

Ann Miloski: "Right. Okay. Well, anyway-- "

Deputy Supervisor Stark: "We got to keep you on record."

Ann Miloski: "There is contamination on the site and that should be looked into."

Deputy Supervisor Stark: "That was contamination I believe that was discovered-- "

Ann Miloski: "It was done by Grumman's but regardless of who it was done by, it's there and in their last test well that they did in 1993, it shows that it was above drinking water standards."

Deputy Supervisor Stark: "Right. And one of the things and if you want to tie Grumman's in with OMNI, in our quest to gain control of OMNI and you can correct me if I'm wrong, Andrea, that all of the-- "

Councilman Prusinowski: "You mean control of Grumman's."

Deputy Supervisor Stark: "Control of Grumman's, any contamination process that could be found has to be mitigated before and paid for before they come to us. So we would get a facility that is free and clear so to speak. Been baptized, cleansed."

Ann Miloski: "Well, will they clear the contamination on the OMNI site?"

Deputy Supervisor Stark: "Pardon."

Ann Miloski: "Will they clear up the contamination on the OMNI site before OMNI takes over?"

Deputy Supervisor Stark: "Certainly."

Councilman Prusinowski: (inaudible) law."

Deputy Supervisor Stark: "It's the flow of water."

Councilman Prusinowski: "That's part of the (inaudible) act and that the congressmens hearing the Department of the Navy indicated afterwards-- after there was a public session as we went down to the stage, he didn't want to say it at that particular time because it's a matter between the government and Northrup Grumman."

Ann Miloski: "Okay."

Councilman Prusinowski: "Mostly who's going to pay for it."

Deputy Supervisor Stark: "I guess what I'm hearing tonight, Ann, is OMNI has withdrawn this particular application and is indicating that they want to come to civic associations such as your own and answer a lot of the questions that you have. At this particular time, I believe this Board will recognize the withdrawal of this application and let them go out into the community and discuss these problems with Wading River Civic Association, Calverton, any-- and discuss them with ourselves and our engineering department. So-- "

Ann Miloski: "So, you don't want me to say anymore?"

Deputy Supervisor Stark: "No. You can say all you want, but in light, you know, you may be asking a lot of questions here tonight that could be, in fact, answered later on in meetings with OMNI."

Ann Miloski: "Well, he's already presented his case and I thought being everyone was here today, I should say the rest. Okay."

Deputy Supervisor Stark: "Fine. I have no problem with that."

Ann Miloski: "Okay. That was the test well. Also, in their compost report on their research project you will see that the magnesium and sulphate level was increased by the site activity. This is only in one year and lead exceeded the New York State Class 1 by 250. That was on one of the composts that was brought up. Correct? Am I correct in what I'm saying? Yes. Okay. So, I think that there

is a lot that we have to study here.

The other thing also on their compost report, they drilled eight test wells. They tested the test wells in 1993. There's been no testing of those test wells in 1994. Now, something can happen between 1993 to 1994 with all that activity going on in the compost. So I think those test wells should be tested."

Deputy Supervisor Stark: "All right. John, we'll give you an answer to come up and respond to it."

Ann Miloski: "The other thing, I'm going to just hand this in on the concerns that we have on their application of 1990 that they should readdress."

Deputy Supervisor Stark: "Yes. I have no problem with that. I would ask the Clerk if she would make a copy of that available to John. If you'll take-- John, after she can give you a photostatic copy of that so that you can address those issues. Yes, Vic?"

Councilman Prusinowski: "What I would suggest is that there's a number of people here who are going to raise questions on the operation. I notice a lot of people in the room today were not here several years ago when your original application-- who have just moved into Town or are new neighbors. What I would suggest is that we can arrange another public meeting here, an informational meeting, where the community leaders could give you specific questions and concerns and we'd have a forum like this where we could have an all night back and forth and we can answer all those questions and some of the new concerns they have.

I do want to say one thing. I was there the day the demonstration. The reason why there was different patches of sod all over the test site is because they were-- it was a test. It was an experiment and they used different types of compost from different plants around the country and it's probably one of the results was, Ann, that this particular compost what the DEC and the Cooperative Extension is explaining to me, might not have good results and that's the ones we want to avoid in the final process. And I'm sure that could be an explanation-- that's what they told me the day at the site because I know News 12 was there and Newsday and the DEC and everybody else was there that day, so but these are some of the questions I think we want

to have out there."

Deputy Supervisor Stark: "John, if you would come back up to the microphone because we're on record. I would appreciate it. Thank you."

John Cameron: "I think we all recognize that it's been a few years since we've had a public session where we've gone through the entire process where we are at and I think it would be very appropriate since we're getting closer to the start of construction. We are finalizing contracts with other Towns and the project is becoming a reality so maybe it would be very appropriate and timely to sit down and have an open session and we welcome that."

Deputy Supervisor Stark: "Fine. I think Ann as a (inaudible) of the Calverton Civic Association-- are you still president of that?"

Ann Miloski: "Yes."

Deputy Supervisor Stark: "Can't get rid of that job. More than likely she would be more than happy to have you up to one of your meetings in Calverton. We can arrange to have some public information meetings right here at Town Hall. There might be some other interested parties and as you suggest, that may be fruitful."

Is there anybody else who would have any comments? Dorothy?
She's got nice hair, too, Alice."

Dorothy Jermusyk: "I was here two and a half years ago. Dorothy Jermusyk, Route 25, Calverton. Less than a half a mile from the proposed OMNI facility. I objected to this facility way back when it was first introduced. There will certainly be offensive odors, untold traffic, and litter along the road. I feel this is not the proper location for a facility of this kind. This is the main highway, the entrance of our Town. I feel this will greatly affect the values of all the houses in this area."

We are known to be the dumping grounds of the East End. First welfare, next sewage, and now garbage. I thought we were supposed to be promoting tourism. Not dumping sites. Please add my name to the list of objectors to this site. Thank you."

Deputy Supervisor Stark: "Thank you. It's good to see you again, though, Dot."

Dorothy Jermusyk: "Thank you. Yes, sir, I'll get you in a second, Kenny."

Sandy Sanchez: "Good afternoon, Sandy Sanchez, Calverton. One of the questions, of course, nobody particularly cares for this site over in Calverton right off 25. One question I had is--"

Deputy Supervisor Stark: "Bill, please. We've got a speaker at the mike."

Sandy Sanchez: "Thank you. What happened to the dump that we had? At this point in time, it is not full. There is a lot of extra room on it. To the best of my knowledge, you can correct me if I'm wrong, and I think that the DEC would approve that facility up on the dump site very quickly."

Councilman Prusinowski: "I want to say one last time, the Department of Environmental Conservation will not approve this plant on that site. We've asked them over and over again. They just will not do it."

Sandy Sanchez: "Do you have that in writing?"

Councilman Prusinowski: "I'll tell you right now. We are fighting with them on a bulkhead and the Department wants a certain 50 feet preserved. It doesn't make any sense to me and we ask them why, why, why, why? And they said because this is what the regulations are. They have specific regulations which we agreed to tonight in writing to close the landfill. We broached the subject many times with them. Right now, just to get a permit to use the Grand Canyon as I call it on the other side, we're going to be placing our compost piles down there. As we collect all the yard waste in Town, we're going to compost them up and we have to get a permit to do that.

They have specific-- they have a philosophy which we've been battling with them since 1990 on closing this landfill. The only other option we have up there is reclaiming the landfill which we are probably going to put in a-- the Board hasn't decided yet, but one of the options we have is to put an application in to mine the

landfill, reclaim it, and then at that point something else can be done with it. But the way the landfill is today, they will not allow a project like this on there."

Sandy Sanchez: "Even though there's a lot of extra land there?"

Councilman Prusinowski: "I-- they-- I completely agree with you. It makes a lot of sense. We've asked them over and over. In fact, we signed a document tonight and we fought like hell just to get the concessions we got out of them."

Sandy Sanchez: "No. I can appreciate all this."

Councilman Prusinowski: "Yes. It doesn't make any sense to me. I completely agree with you and even to use I call it the Grand Canyon, it's just very unreasonable."

Sandy Sanchez: "No, one of the questions I think-- "

Councilman Prusinowski: "It's too logical. That's why we can't do it probably."

Sandy Sanchez: "I realize that. One of the questions though I would say, that if you say to me that they refuse to give us a letter as to why you cannot use it or a reason. I can't understand that. Because there are-- I've done things. I've worked for a major oil company, worked with the DEC. There's no problem normally in getting the reason spelled out pretty-- "

Councilman Prusinowski: "I'm sure we have it on file. I'd be more than happy to have it made public and I know it's in their regulations. It's a big fat book regulating the closure of this landfill and other options and just only recently they've added the option of reclaiming the landfill which I think a few towns upstate-- I know in New Jersey and other states in the union have been doing that where their waste stream is appropriate."

Sandy Sanchez: "Right. So you have-- "

Councilman Prusinowski: "It's very frustrating."

Sandy Sanchez: "Do you think we can get the documents in and

read them?"

Councilman Prusinowski: "Sure."

Sandy Sanchez: "All right. Do you want me to come down and put in--?"

Councilman Prusinowski: "Yes. I'll have to-- I have them in a box. We're going to have to find them and certainly we have all the reports here that we've submitted to them."

Sandy Sanchez: "All right. So when would you like me to come down? Soon."

Councilman Prusinowski: "Not soon. Today--"

Sandy Sanchez: "How soon? Real soon."

Councilman Prusinowski: "I'll tell you what. First part of next week. Let me make some calls to Frank Isler and our engineers and we have to gather the information for you. It is somewhere between our engineers, Frank Isler, and this building."

Sandy Sanchez: "All right. I saw a copy--"

Councilman Prusinowski: "I remember the meeting specifically and I'll tell you who was in the room. It was Harold Berger, Denise-- Councilwoman Denise Civiletti, myself, Tony Conetta from Dvirka and Bartilucci, their technical staff which I call, you know, technical staff, and Harold Berger. Harold's very-- he was the commissioner and like Ray Cowen, they're wonderful people. They're very nice, pleasant. They want to make a deal with the Town, but (inaudible) the technical people say, my the water quality-- we'll never sign off on that. The solid waste department commissioner, right in front of the commissioner, in front of the other elected officials, it's a very bizarre department and I know that it's frustrating for a lot of state officials. I know Ken LaValle was in here today and the senator was telling me how frustrated he is sometimes working with the department."

Sandy Sanchez: "He told Steve that, too, this morning. Well, there's other-- all right, fine. Then I'll give you a holler--"

Councilman Prusinowski: "It was one of the first options-- and I think John will tell you it was one of the first options we all looked at because it makes too much sense."

Sandy Sanchez: "Right. Well, that's, you know, maybe we could-- because it's an election year we might be make a little bit more sense out of it."

Councilman Prusinowski: "Well, I can tell you it's an election year because this document we signed, we got all kinds of goodies that we never would have gotten, but on the other hand, it's been a process since 1990 that we've been working on it."

Deputy Supervisor Stark: "I don't know whether we can get that all in by November 8th."

Sandy Sanchez: "Thank you."

Deputy Supervisor Stark: "Kenny? Remember, Kenny, this application has been withdrawn."

Ken Tuthill: "Okay, but he did, excuse me. Ken Tuthill, Calverton resident, also Chairman of Calverton Study Task Force. Mr. Cameron also did reserve the right to bring this before the Board again at a future date, therefore, I think that I will read my letter in its entirety to the Board, and, frankly, I didn't see a yes vote. If this vote was taken tonight, I didn't see a yes vote sitting before us at all. And I'll tell you the reasons why. I address the Board-- "

Deputy Supervisor Stark: "You didn't see a yes vote on what, Ken?"

Ken Tuthill: "On the sludge, the projected amendment to the permit to allow sludge into the composting facility."

Deputy Supervisor Stark: "I don't think you read the Board that well."

Ken Tuthill: "Okay. Well, I'll tell you what-- "

Deputy Supervisor Stark: "So, don't, don't put votes in our mouth."

Ken Tuthill: "Okay."

Deputy Supervisor Stark: "Because I think this is-- it's got other agenda to it."

Ken Tuthill: "Okay. I addressed the Board on September 20th at the Board Meeting in the afternoon concerning the proposal to amend the OMNI special permit. The amendment would allow OMNI to mix septic sludge with compost material. My main theme was that things have a way of changing and now Councilman Prusinowski understands our concerns."

He was informed that OMNI would accept only Riverhead septic sludge which he told me at that meeting. Mr. Cameron, and I quote, says while plans right now only include Riverhead sludge, a special permit would not exclude such wastes from other towns.

As a matter of fact, Supervisor-- Southampton Supervisor Fred Thiele is relieved, no pun intended, and happy to say all-- I quote, all of our sewer sludge will be going there because Riverhead and Southampton share a sewage treatment facility. Other municipalities have greater industrial bases which would mean highly toxic sludge. The other municipalities would also have to be identified if they are bringing their sludge into this facility and constantly monitored.

Councilman Prusinowski's statements that he made in the paper more or less tell me that he would not vote for this-- he would not let his vote for this stand in the way of completing the project itself."

Councilman Prusinowski: "That's correct."

Ken Tuthill: "I read that one right."

Councilman Prusinowski: "Yes, and you have me absolutely correct on that one."

Ken Tuthill: "Okay. At the end of the September 20th Board meeting, Councilwoman Gilliam verified my suspicions that septic sludge would be entering the compost site from other municipalities. And she not only understands our concerns, but has expressed concerns of her own."

Deputy Supervisor Stark: "Could you do something for me and define septic sludge from sludge cake or treated sludge? I mean you're putting a word out there septic sludge. Are you talking about sludge in your conception that is coming right off of what we used to call the honey wagon? I guess we still call it honey wagon."

Ken Tuthill: "No. I'm not. I am talking exactly about what we were talking about on the 20th, the meeting of the 20th."

Deputy Supervisor Stark: "You are talking about treated sludge cake?"

Ken Tuthill: "They would be sludge cakes, but-- "

Deputy Supervisor Stark: "From the scavenger waste plant."

Ken Tuthill: "That's right. But, Mr. Cameron just stated that they will be 80% moisture content. That is pretty loose."

Councilman Prusinowski: "Well, that's the way-- just to explain it to you. When we make-- "

Deputy Supervisor Stark: "Have you ever eaten potatoes?"

Ken Tuthill: "Yes, I have."

Deputy Supervisor Stark: "What is the water content of a potato?"

Ken Tuthill: "Oh, I imagine there's a lot of water in potatoes also."

Deputy Supervisor Stark: "Answer it?"

Ken Tuthill: "I have no idea of that."

Deputy Supervisor Stark: "Eighty-five per cent. That's pretty solid."

Ken Tuthill: "Okay."

Councilman Prusinowski: "Just to tell you. We are not making cake now because we have to-- we have to make the liquid form to go

to Bergin Point, but the cake that we make and we were taking to our landfill prior to that, that composition was analyzed. It is 80% moisture just so you know."

Ken Tuthill: "Okay, thanks, Vic."

Councilman Prusinowski: "At least (inaudible)."

Ken Tuthill: "Going back to Councilwoman Gilliam, I believe she is to be commended on her ability to read between the lines. Councilman Creighton is also to be commended for staying back and looking at the big picture. And I quote, things have changed since we approved the special permit in 1991. And he goes on to say that additional knowledge on composting technology and hazards associated with its byproducts has also been generated."

His concerns seem to rest with two issues, one, is OMNI still a viable solution, and two, is OMNI in breach of an obligation for failing to construct a transfer station at their site before the intern period of 18 months has expired?

Acting Supervisor Stark is the lead person of the Calverton Hamlet Study Task Force has a hands on knowledge of what we are trying to accomplish in Calverton with tourism and recreation. It is with his inspiration that the Hamlet Study got off to such a good start. That's what I believe is and now let's move on to what will be.

At the request, OMNI has reopened their special permit hearing asking for change. It is only appropriate at this time that the Town Board should be able to make changes in the original special permit. First and foremost, OMNI should be required to complete an EIS, Environmental Impact Statement, which would be particularly interested -- interesting is their responses to some of the following topics. Impact on air, and at this time the continuous air monitoring and sampling on site and off site should be addressed. Impact to open space and recreation, specifically there is a question will the proposed action affect the quality of existing or future open spaces or recreational opportunities. What comes to mind here is the Calverton Links. Bill Schuman spoke at the Wading River Town Board Meeting a few years back and asked the Board to make a confirmation as to what their decisions were going to be for the (inaudible) community before he invested 2.2 million dollars into an area that had the potential

for becoming the garbage capital of Suffolk County.

I won't even mention the possible impacts that this could have on Splish-Splash.

Noise and odor impacts should be addressed; public health should be addressed. Impact on growth for the character of the community. I formally request that the Town Board hire our own expert to review the special permit with or without modifications at the cost of the applicant. Expert opinions have to be rendered on these topics. If there are any benefits derived from the use of such sludge compost, the effects on edible and non-edible crops has not even been addressed. And the long term effect to the land.

I'll give you an example of how things can go astray. The idea of a hormone being injected into a dairy cow to increase production of milk sounded too good to be true. Testing by experts showed it was safe. The FDA approved the process and said milk from these cows was safe for human consumption. Now, the dairy cows are dying from diseases as a result of this hormone. Talk about killing the golden cow.

I found inconsistencies when Mr. Cameron was up here into-- he mentions that now is the time that he would like to bring this forward -- this sludge process and he didn't bring it forward before when he applied for his application years ago. I don't understand what has changed. By any other name-- a rose by any other name is still a rose. You are using fancy terms, a compost site. What you have is an enclosed dump. Compost, you're talking about garbage. Biosolids or sludge. You have (inaudible) by any other name.

I think what you're doing also is opening up a can of worms and I didn't want to bring this up but I think it has to be addressed and will be addressed sooner or later by the people in the area surrounding the proposed facility. I was here also, Vic, at the opening hearings and Mr. Cameron also made a promise to purchase a house of a young gentleman and his wife and family before they put the backhoe into the ground for construction. I expect him as the good neighbor that he claims he wants to be to hold true on that promise.

But, I would feel he would be even a better neighbor if he could relocate his facility someplace where there's less density in some

part of this Town if he wants to stay in Riverhead. If not, I think you're opening up a can of worms. Riverhead is saving money on their carting fees, and at whose expense? This is good for the community but at whose expense? The local residents who live within that area are going to see their property values plummet. Now, are we talking here some equitable solution for the people who own property in the area? Are we talking tax-- some kind of a tax cut for people who live in the area? I think this is opening up a can of worms that was and should have been addressed further at the original hearings.

Thank you."

Deputy Supervisor Stark: "Thank you. Is there anybody else who would like to speak at this particular time? Remind you that this application has been withdrawn and will be discussed in the community. Yes, sir? I always understood you to be Co-Chairman."

Stan Treman: "Stan Treman from Calverton Links. I might just mention that Bill Schulman would have been here but he's out of town so I might be pinch-hitting for him. I'm sure in an inadequate manner. But, basically I have a question which came to mind on some remarks that Ken Tuthill had and I wasn't-- am not up to date on this. I don't know much about the application. Obviously, I wasn't here when it was originally filed. But the question I have is, was an independent consultant brought in to study OMNI's proposal with regard to all the technical elements that I've heard discussed tonight? And, if not, why not? And if it was done, is what Mr. Cameron's asking for-- does it jive with what our independent consultant has come up with? I would think that a project of this magnitude and scope where you've got such great possibility of contamination and all kinds of chemical contamination, should be studied before any site is approved and before any project is approved. So I would like to ask, has this been studied thoroughly. Thank you."

Deputy Supervisor Stark: "I think, John, you want to respond to that?"

John Cameron: "As a matter of record, the Town did hire an independent consultant to evaluate the project, our permit application. I believe it was Clark Engineering (phonetic) out of upstate New York. The Town billed us for his services and we reimbursed the Town for those services. But, I'm sure his report is available, but he

evaluated our technology and permit application prior to the Town Board making any decision."

Councilman Prusinowski: "Did you do an impact statement, John?"

John Cameron: "We did a full Environmental Impact Statement on the facility prior to-- as part of the SEQRA process it was required by the Town Board and it was submitted and reviewed by all the agencies and approved."

Councilman Prusinowski: "I will search out that Clark report. I think I have it somewhere in my stack of stuff and make it available to the public-- for the public information."

Deputy Supervisor Stark: "It is also on record in the Town Clerk's office. Steve?"

Steve Haizlip: "Steve Haizlip of Calverton. I'm in agreement with Kenny Tuthill that this composting plant be located somewhere rather than 25, and I believe the reason that the DEC doesn't want to do it, there is not a suitable road to get to over to the north shore or to some isolated area. In that case, a good solid road like 25 should be built because that's the reason they want to go on 25 because there's a good suitable road there. And it's solid, thick and heavy and it won't break up. The secondary roads in the Town will break up and it will be very expensive to build a road, but I say we ought to build it to get that thing off of 25. And concluding, I endorse Kenny Tuthill and I endorse Ann. Let's get into the community, let's get these people out and let's get hard questions to them and get straightforward answers."

Deputy Supervisor Stark: "Thank you, Steve. Is there anybody else who would like to make a comment at this particular time? If not, I guess the withdrawal of the application, the Public Hearing is closed. John, I hope that you'll contact those parties that were talking tonight. If anybody wants to know how to get a hold of John Cameron, we certainly have that information available here in Town. Ann, you know how to get a hold of him, Kenny knows how to get a hold of him and we'll go from there. Thank you."

Public Hearing closed: 8:45 p.m.

Deputy Supervisor Stark: "At this particular time, there are no other Public Hearings tonight. I would recognize anybody that would like to talk on any particular subject at this-- yes, Clete? Clete, just-- why don't we wait a second. A few of these people might be-- if anybody would like to leave after the closure, we'll hold up here just for a second. Kenny, take it outside, I've got some speakers here. Those who would like to discuss this out in the hallway, I would request respectfully that you do it. Must be good Clete, you're losing half your audience. Okay, can I have your attention. We have a speaker at the podium."

Clete Galasso: "My name is Clete Galasso, Meetinghouse Creek Road. I'm just surprised that my site plan wasn't on the calendar tonight. I was told by Rick Hanley that it was supposed to be."

Deputy Supervisor Stark: "It was not discussed at the work session last Thursday, I know that, Clete. Is Rick around tonight? All right. It was not discussed at the work session last Thursday."

Councilman Prusinowski: "Did you go to the ARB yet?"

Clete Galasso: "Well, I spoke to Rick Hanley and he said that you were going to look at it at Thursday's work session."

Deputy Supervisor Stark: "It was not presented to us at the work session Thursday."

Clete Galasso: "So, you haven't even seen it yet?"

Deputy Supervisor Stark: "No."

Clete Galasso: "Thank you."

Councilman Prusinowski: "But, find out-- find out."

Deputy Supervisor Stark: "Thank you. Is there anybody else who would like to talk to the Board on any particular given subject? Bill?"

Bill Noehjl: "Bill Noehjl, Aquebogue. At the Jamesport meeting, we had a discussion-- I presented to the Town Board the dangers of South Jamesport, the bridge. That I must commend has been taken care of, cleaned up and signs posted also on Raynor Avenue. But, contrary

to that, the place on Meetinghouse Creek has not been cleared up."

Councilman Prusinowski: "No."

Bill Noehjl: "I've had Rich Gazinsky down there. He looked at it. He got in touch with Ken Testa, got in touch with the town attorney. Right, Bob? Okay."

Deputy Supervisor Stark: "Are you talking about the parking area at Meetinghouse Creek."

Bill Noehjl: "It's a bulkhead. Where the bulkheading is. At that time at the South Jamesport-- "

Deputy Supervisor Stark: "We're approving the bulkheading of that tonight. I don't know whether it's on the agenda or not."

Bill Noehjl: "There's nothing on there."

Councilman Creighton: "Where did it go to I wonder?"

Deputy Supervisor Stark: "Where did it go to?"

Councilman Prusinowski: "I have it on my desk so I'll go get it. We've got to do it tonight."

Bill Noehjl: "But that does not mean that there is not imminent danger being that you're putting it out for-- "

Councilman Prusinowski: "We're awarding the bid tonight."

Bill Noehjl: "But that doesn't eliminate the danger that exists there."

Councilman Prusinowski: "Well, I-- "

Bill Noehjl: "It's been existing, thank God nothing has happened."

Councilman Prusinowski: "It's my understanding that contractors are going to begin right away and it's going to be fenced off anyhow."

Bill Noehjl: "Vic, it's been a month and a half since I spoke to

you."

Councilman Prusinowski: "Bill, okay, all right, okay. We didn't do anything about it? I'm sorry, Bill. Okay."

Bill Noehjl: "So am I."

Councilman Prusinowski: "All right."

Bill Noehjl: "I'd like to bring to your attention that the two culverts, one at Meetinghouse Creek, and the one at Saw Mill Creek are beginning to collapse. The center, there is a pothole where they continuously patch up."

Deputy Supervisor Stark: "Where is Saw Mill Creek, Bill?"

Bill Noehjl: "You've traveled over it, Vic, and-- "

Councilman Prusinowski: "The-- you're talking about the bridge?"

Bill Noehjl: "There's a hole right in the center and-- Saw Mill Creek."

Councilman Prusinowski: "The bridge?"

Bill Noehjl: "And that thing is rusted underneath there."

Councilman Prusinowski: "Oh, oh. Right. That's-- yes, you're talking about the-- "

Deputy Supervisor Stark: "Where is Saw Mill Creek?"

Bill Noehjl: "It's the water-- the drain under the road."

Councilman Prusinowski: "Right."

Deputy Supervisor Stark: "Where is Saw Mill Creek, Bill?"

Bill Noehjl: "Just east of 105. On Hubbard Avenue."

Councilman Prusinowski: "Right."

Deputy Supervisor Stark: "You mean the one that comes in from Terry's Creek."

Bill Noehjl: "It runs over to the (inaudible)."

Councilman Prusinowski: "Right. The one-- the other one is scheduled to be replaced with our ice tea money and the one on Hubbard Avenue I'll ask Charlie about. Saw Mill Creek. That one we have to take a look at. The other one is scheduled to be replaced."

Bill Noehjl: "Last spring there was a big article in the paper about the chop job on the trees on Main Street. If you were to go there and recognize that chop job, which is magnificent now, the way the trees are shaped, you see it with the foliage, they're shaped. The other ones that have not had the chop job, is going scraggy and all over the place. I suggest that you get the fellow back in there to do the chop job on the rest of it. Because it is beautiful what has been done. It looked ugly when it was bare, but look at it now, it's really appealing."

Deputy Supervisor Stark: "I appreciate that, Bill, because on my desk there are pictures of the trees that were trimmed and those that are not trimmed. Also, I have along with that the-- some of the so called experts who said that these trees were going to die and, frankly, I think they're more healthy and fuller and will continue to flourish even more rapid than the other ones. The other ones to me are getting to look a little scraggly and if you shape them, then they get fuller as you well know as with all of the nursery stock that you have on your property across the street. It's a continuous job and it's one that needs trimming. But I agree with you there. Thank you for making that comment."

Bill Noehjl: "Two other questions."

Deputy Supervisor Stark: "We're not-- we're not all pinheads up here trimming the pin oaks."

Bill Noehjl: "Two other things. The people are throwing the garbage out onto the streets, it's terrible. It has not been eliminated with this construction debris. Go on Edwards Avenue. You'll see a big stack down there now. That is an entrance into Riverhead. Across from McDowell's Electric, if you're familiar, about

a half a mile south of Crossroads. And West Main Street, Hubbard Avenue. Hubbard Avenue this side of the bridge. Hubbard Avenue the other side of the bridge. Peconic Bay Blvd., east. It's just out there. I don't know what-- how you are going to control this."

Deputy Supervisor Stark: "I don't know either unless you make people more conscious of their daily habits. It seems to be upbringing and what have you, Bill. Certainly, we do the best we can. There are people out there that are just discarding garbage at nighttime or daytime or what have you. I don't believe that this Town has the financial resources-- ."

Bill Noehjl: "No, it's right in front of their homes. Not people discarding it."

Deputy Supervisor Stark: "Sometimes that garbage is discarded, sometimes it's an eviction. We are, Bill, sometimes it's an eviction."

Bill Noehjl: "Sometimes. But these trees, limbs and all that out in front of a person's property is not an eviction or garbage. It's-- "

Deputy Supervisor Stark: "Well, there's all assortment of garbage out there that you're talking about. We continue when it's brought to our attention, we do the best we can to get our people there to clean it up. And in the same instance, people have to be a little self-conscious themselves."

Bill Noehjl: "Also, signs. Since Tanger came in, big signs all over the place. This Town years ago had a sign ordinance. It's going to pot. You look at the street corners, there are illegal signs being put up. Tanger with that 60 foot elevation. Never had there been a sign like that in Riverhead before."

Deputy Supervisor Stark: "That sign was approved, Bill."

Bill Noehjl: "I know it was."

Deputy Supervisor Stark: "It was approved during a Public Hearing and what have you. It's there."

Councilman Prusinowski: "We give out-- we have a lot of people

in Court over the sign violation, the sign ordinance."

Bill Noehjl: "Thank you."

Deputy Supervisor Stark: "Is there anybody else who would like to speak on any particular given subject at this particular time? Please, Steve. Steve?"

Steve Haizlip: "I thought Vic was waving for someone."

Deputy Supervisor Stark: "No. He wants to talk to Andrea Lohneiss."

Steve Haizlip: "Oh, okay, all right, I understand."

Deputy Supervisor Stark: "I would only like, you know, Bill, while you're there. Many times you come here with good ideas, and don't get me wrong. But many times that these complaints or violations that you see out there, if you would call Town Hall or show up here, certainly we could take care of them on a daily basis."

Steve Haizlip: "Oh, sorry."

Deputy Supervisor Stark: "-- to the best of our ability and-- "

Bill Noehjl: "Excuse me."

Deputy Supervisor Stark: "Sometimes you make it sound as if the Town is one big garbage pit. I travel Peconic Bay Blvd. I travel Hubbard Avenue. Maybe you're looking for it a little harder than I am but, certainly, I take phone calls every day and I relay that information on to either the Buildings and Grounds, Highway, or even the Sanitation Department. And I sometimes would appreciate it if that same information would be passed onto-- "

Bill Noehjl: "It has been passed on to the Code Enforcement Officer."

Deputy Supervisor Stark: "As a matter of fact, Victor had a very good suggestion."

Bill Noehjl: "Beg your pardon?"

Deputy Supervisor Stark: "Since you travel around this Town quite often, maybe you would like to come under the employment as a volunteer Code Enforcement-- "

Bill Noehjl: "Pay me and I'll do it. Like everybody else."

Deputy Supervisor Stark: "Oh, okay."

Councilman Prusinowski: "No. I didn't say volunteer. I said to hire you and pay you to help us out."

Bill Noehjl: "And I reported-- "

Deputy Supervisor Stark: "You're doing a pretty good job as a volunteer right now."

Bill Noehjl: "I come here. I report it to Rich Gazinsky. And everytime he seems me coming, it's if now what?"

Councilman Prusinowski: "Actually, Bill, we're going to talk about it in the budget for the Solid Waste District. We need some more help for some inspectors. You're absolutely right. Because we're-- between the signs and everything, Rich is overwhelmed right-- ."

Deputy Supervisor Stark: "I thought I could get him to volunteer, Vic."

Councilman Prusinowski: "Well, I agree with Bill. I mean we should pay him for his time."

Bill Noehjl: "While I'm here, I must say you say you can't use the landfill for septic or sewage or-- "

Councilman Prusinowski: "I didn't say that. That's what they-- "

Bill Noehjl: "All right. What they say. What's the matter with buying adjacent land to it and putting that facility so it would be all in one area instead of 25 in Calverton?"

Deputy Supervisor Stark: "Thank you, Bill."

Bill Noehjl: "Thank you."

Councilman Prusinowski: "There might be another location."

Deputy Supervisor Stark: "Steve?"

Steve Haizlip: "Steve Haizlip of Calverton. This here item is only a point of information. It's to show what's going on with the DEC. Bergin Oil Company made an honest mistake. They put a little oil into the wrong hole. They reported it immediately and now they're trying to be holding them up \$800,000. Stuff like that puts companies out of business and employees out of jobs."

Now, the next item, I learned recently that the DEC is in our Highway Department. We've got a bad pipe on Edwards Avenue down by River Road. It's clogged from a (inaudible). As it developed a hole, just kept putting some (inaudible). Now it's completely clogged and the water won't-- the wastewater won't run through no more. They've got to give us three months-- about three months it takes to get an okay from them. We have capable highway people in this Town and we've got knowledgeable and we've got a good engineer that can help us. Why do they got to get in the act on our roads when they don't even get in the act on their roads? And I brought that up with Mr. LaValle today. And so he says, we are going to see what-- "

Councilman Prusinowski: "Were you here when Ken LaValle was speaking?"

Steve Haizlip: "Yeah."

Councilman Prusinowski: "Oh, good, good."

Steve Haizlip: "He said he's going to see what he can do."

Councilman Prusinowski: "Oh, good, good."

Steve Haizlip: "Right."

Deputy Supervisor Stark: "Let me know when you hear back from him, Steve."

Steve Haizlip: "Yeah, I know what you mean. When you are going down 58, you see a sign and it says, Tanger Drive Mall. I believe that's a little bit misleading. I think it sort of implies that

Kroemer Avenue is Tanger Drive Mall. It isn't. It should read, To Tanger Drive Mall. I mean that's just a point of information. That's the way I see it."

Deputy Supervisor Stark: "We'll put a to on that."

Steve Haizlip: "Right. Now, next item, there have been three serious accidents by Calverton Deli. I wish that the Town Board, especially-- maybe I could call on Vic, he was very instrumental in helping me with the yield sign and I believe it was either-- it might have been Boschetti and John, where they have the right lane ending on 58 going to Splish-Splash, it was actually the left lane. So we got that straightened out. So, appreciate it, Vic, and somehow or another, maybe we can get a letter to the Department of Transportation Motor Vehicles or whoever it has to be that we have had three serious accidents and people have ended up in the hospital and Millie Donohue (phonetic) had to go with one of them in the ambulance."

Councilman Prusinowski: "It's right at that intersection."

Steve Haizlip: "Right."

Deputy Supervisor Stark: "Maybe I could put up one of my pedestrian signs up there. See how it works out."

Steve Haizlip: "Something should help."

Deputy Supervisor Stark: "I bet you two to one it slows traffic down and you would probably eliminate the accidents."

Steve Haizlip: "Yes. Some of them."

Deputy Supervisor Stark: "But that's against DOT law and that saga will continue and we did speak to Senator LaValle today about it and he does have legislation in that will allow us to have some control over our state highways within our Business Districts and what have you. So, hopefully, but who knows? The signs will appear again very shortly. They've got six of them on us now so we are going to give them three more."

Steve Haizlip: "Today after I left from here, I stopped by my favorite hangout, Dunkin Donuts, to get a cup of tea and there was two

ladies in there and they jumped on me to do something about Middle Road going south. I haven't seen this. I don't know anything about it. But I just said I'd mention it and maybe somebody here can look into it. They claim down there by the Star (phonetic) trailer camp-- "

Councilman Prusinowski: "Mill Road."

Steve Haizlip: "Mill Road, going south, by the railroad-- "

Deputy Supervisor Stark: "Mobile home community."

Steve Haizlip: "Yeah, they say the hedges. Now, as I say, I am just only bringing this up and I didn't investigate it to check it out, that the hedges-- "

Councilman Prusinowski: "Need to be trimmed."

Steve Haizlip: "You can't-- they say time you get out the road to see if something is coming, your front end is exposed. So, they want that cleared up, if possible."

Deputy Supervisor Stark: "Sure."

Councilman Prusinowski: "I think I'll call the landlord tomorrow, the owner of the mobile home park."

Deputy Supervisor Stark: "Better you than me."

Steve Haizlip: "Vic, appreciate it."

Councilman Prusinowski: "He's got a light there which we cooperated with. I think I'll ask his cooperation on-- "

Steve Haizlip: "Yeah, they were (inaudible) about a flashing-- about a light being there."

Councilman Prusinowski: "Well, we have one there."

Deputy Supervisor Stark: "With your (inaudible) you're going to be stopped at a lot of places."

Steve Haizlip: "Well-- "

Deputy Supervisor Stark: "Thanks to Ruth Jernick and her paper."

Steve Haizlip: "It's my business to be a community (inaudible) and help out where I can and part of the stuff that I've done, there wasn't enough room to publish it, like saving the tax exemption for the veterans back in 1979. Thank you very much."

Deputy Supervisor Stark: "Thank you, Steve. Let us take up the Resolutions."

Resolution #687

Councilman Prusinowski: "Order authorizing the increase and improvement of the Riverhead Water District. So moved."

Deputy Supervisor Stark: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Resolution #688

Deputy Supervisor Stark: "Authorizes Town Clerk to publish and post notice of Public Hearing. So moved."

Councilman Prusinowski: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #689

Councilman Creighton: "This releases the Aquebogue Associates' bond of International Fidelity Insurance Company. So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #690

Councilwoman Gilliam: "Authorizing the submission of an application to the New York State Department of Economic Development Urban Development Corporation for infrastructure improvements. So moved."

Councilman Creighton: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Deputy Supervisor Stark: "Okay, Resolution #691, Barbara, will be pulled and I have to go to a Public Hearing. So, we're pulling 691, that will be a void Resolution number."

Barbara Grattan: "Okay."

Resolution #692

Deputy Supervisor Stark: "Adopts the amendment to Chapter 48, Beaches and Recreation Centers of the Town of Riverhead."

This specifically takes and puts the Jamesport, what was the former New York State boat ramp into our code so that we have total control of that now. So moved."

Councilman Prusinowski: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam?

Councilwoman Gilliam: "Question on the Resolution."

Deputy Supervisor Stark: "Yes?"

Councilwoman Gilliam: "I recall when we had the Public Hearing

in Jamesport regarding this provision that there was a request from some of the public safety organizations about an exemption. Has that been addressed?"

Councilman Prusinowski: "No. I think all we have to do-- "

Deputy Supervisor Stark: "This basically gives us control of the-- what we allow to go on there is not-- really not the concern of this Resolution. This is adding it to our-- "

Councilman Prusinowski: "This has to do with another Resolution, Harriet."

Deputy Supervisor Stark: "This is adding it to our-- "

Robert Kozakiewicz: "In this, Harriet, I thought that we would address it on (inaudible)."

Councilman Prusinowski: "We have a request."

Robert Kozakiewicz: "If you would entertain that request."

Councilwoman Gilliam: "All right."

Councilman Prusinowski: "We have one from the auxiliary."

Deputy Supervisor Stark: "The Coast Guard Auxiliary."

Councilwoman Gilliam: "The Coast Guard."

Councilman Prusinowski: "So we'll do it at the next work session."

Deputy Supervisor Stark: "Any other discussion? Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. This Resolution is adopted.

Resolution #693

Councilman Creighton: "This approves the site plan of Long Island Cauliflower Association for a building relocation. So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Resolution #694

Councilwoman Gilliam: "Authorizes the naming of a private road in Jamesport to Kimmel Lane. So moved."

Councilman Creighton: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Resolution #695

Councilman Prusinowski: "We're awarding the bid to paint the tank. So moved."

Deputy Supervisor Stark: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #696

Deputy Supervisor Stark: "Without objection from the Board, we are appointing several recreation aides. You want to go through them quickly. I would move Resolutions 696 through 708."

Councilman Prusinowski: "Seconded."

Deputy Supervisor Stark: "Which are appointing recreation aides to our fall and winter programs."

Councilman Creighton: "No objections."

Deputy Supervisor Stark: "No objections. Moved and seconded."

Councilman Prusinowski: "And I second those Resolutions."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolutions are adopted.

Resolution #709

Councilman Creighton: "This appoints Jeanmarie Costello, Esq. as a Hearing Officer in the matter of disciplinary proceeding involving a town employee. So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Resolution #710

Councilwoman Gilliam: "This approves the site plan of the Manor at East Wind. So moved."

Councilman Creighton: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam?

Councilwoman Gilliam: "I am going to abstain at this time because I still have some concerns and reservations about paragraph 14 in particular which addresses the private right of way and improvements being made to that. I understand there's a revised Resolution that I've just been handed."

Councilman Prusinowski: "All right. So we're moving the revised one then, right?"

Barbara Grattan: "Yes."

Deputy Supervisor Stark: "Do we have a copy of the revised one?"

Barbara Grattan: "No, you do not."

Deputy Supervisor Stark: "Is that-- may I see a copy of the revised one?"

Barbara Grattan: "It's right there. This is my copy."

Councilwoman Gilliam: "Do you know what was the change that was made?"

Barbara Grattan: "No, I do not. I was handed this-- "

Deputy Supervisor Stark: "Is Rick around here?"

Barbara Grattan: "That one and Okeanos were revised."

Deputy Supervisor Stark: "Rick, would you come to the podium, please. We are talking about Resolution #710 which approves the site plan of the Manor at East Wind. I think our question-- or at least my question, again, on the road and the infrastructure of that road and our obligation and I believe Harriet has the same thing. We have gotten a different Resolution, I guess she got, but we don't have in our packet up here, so if you can explain it."

Rick Hanley: "Sure."

Deputy Supervisor Stark: "Or if, in fact, you want a copy of-- to look at for reference, maybe it will bring you up to date."

Rick Hanley: "I am Rick Hanley and I am the Planning Director, and the question is on site plan of East Wind Estates which is a site plan which involves the construction of a catering facility in Wading River, and the property is located on a private roadway which the owner of the premises has a right to pass and repass over. However, the Town Board is concerned about the condition of that right of way and the fact that this catering business expects to have some significant traffic passing over that roadway, and the Board was not interested in approving the site plan until there was some improvement

to that roadway.

The roadway is presently used by the Town Highway Department for access to their Highway barn, and the Town Board negotiated with the owner of the property for a equal approach to improving this highway with oil and sand such that the roadway would meet a reasonable specification for business purposes. So, it's an equal sharing of the costs of that improvement which is estimated by Mr. Bloss to be about \$10,000."

Councilman Prusinowski: "I think the question was, Rick, we know all that. It's-- we have a Resolution in our packet and you handed one to the Clerk prior to the meeting. What is the difference between the two Resolutions?"

Rick Hanley: "The applicant appeared in front of the Town Board a number of months ago, and was negotiating his performance bond and he has already a bond existing with the Town for a restaurant which is on the contiguous piece of property and the Board at that time agreed to not release that performance bond and to hold that bond as the performance bond for the new petition.

So that was the change."

Councilman Prusinowski: "Okay. So there was a change in the performance bond?"

Rick Hanley: "Right. We have an existing performance bond that he is not going to petition for as surety for the site plan."

Deputy Supervisor Stark: "I've never been satisfied with us approving a road, I mean the Highway truck going up and down the road is one thing, now you are going to have general public and we have to supply and spend our money for the general public to get on a private right of way. If he wants to make his business available on that private right of way, then-- "

Councilman Prusinowski: "He'll pay for half of it."

Deputy Supervisor Stark: "Why do we have to pay half?"

Councilman Prusinowski: "Because our entire Wading River facility

is located on this road and-- "

Deputy Supervisor Stark: "It's not one truck, it's on both sides."

Councilman Prusinowski: "Yes, but we use this road. That's what Charlie says, so I would suggest that we table it and have the Town Board ride up the road and look at it. I'm satisfied. I'll vote for it. I'm familiar with our operation there."

Rick Hanley: "If it helps you, Jim, I did speak with Charlie about it."

Councilwoman Gilliam: "Well, Charlie is not an attorney nor is Charlie someone-- "

Rick Hanley: "Oh, are you concerned about the ownership?"

Councilwoman Gilliam: "The State Comptroller's Office and if we talk about making improvements to a private road and the Town bearing half of that cost, then I think this is something that needs to be reexamined and we need to get a legal opinion on it."

Rick Hanley: "Okay."

Councilwoman Gilliam: "-- before moving forward."

Deputy Supervisor Stark: "Would you like to table this? Make a motion to table this?"

Councilwoman Gilliam: "I'll make a motion to table the Resolution."

Deputy Supervisor Stark: "There is a motion to table and it's been seconded. Moved and seconded."

Barbara Grattan: "Hold on just a second. Who seconded that?"

Deputy Supervisor Stark: "Vic."

Barbara Grattan: "Vic."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. 4 Yes to Table.

Resolution #711

Barbara Grattan: "There has also been a new Resolution."

Councilman Prusinowski: "I know that. We have some changes we made this afternoon, so I'm going to move the Resolution that the Town Clerk has in her hand which approves the site plan of Okeanos Aquarium of Long Island. So moved."

Barbara Grattan: "Does everybody know this?"

Councilwoman Gilliam: "No."

Barbara Grattan: "No? They do not know this? The rest of the Town Board doesn't know about this new Resolution?"

Councilman Prusinowski: "Yes, we do."

Councilman Creighton: "What's the change? Can you tell us about-- "

Councilman Prusinowski: "Is this the changes we discussed this afternoon in your office?"

Deputy Supervisor Stark: "That's two."

Rick Hanley: "Rick Hanley, again. These-- "

Councilman Prusinowski: "The changes that we discussed this afternoon on the Supervisor's desk?"

Rick Hanley: "This-- and no others."

Councilman Prusinowski: "Okay. That's all I got to know? I move that Resolution."

Councilman Creighton: "And seconded."

Councilwoman Gilliam: "I have a question. This--"

Deputy Supervisor Stark: "Would you like to see the Resolution?"

Resolution #713

Councilman Creighton: "This approves an application of Barker Farm in Jamesport to conduct the 6th Annual Make-A-Wish 5K Foot Race on October 16th in Jamesport. So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #714

Councilwoman Gilliam: "Authorizes attendance of police officer at traffic accident reconstruction course. So moved."

Councilman Creighton: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #715

Deputy Supervisor Stark: "Resolution #715. I have been approached by Norm Schneider from the local Loyal Order of the Moose Club. He has an opportunity this year to attract the New York State Little League All Star Championship to be played here. It would be played on Labor Day weekend of next year. This would attract to our locale anywhere from 3,000 to 5,000 new tourists, mothers, fathers, sisters, brothers, aunts, uncles, grandpas, and what have you.

We have the facility. This is a Resolution which supports that. He will be traveling to upstate New York this weekend to put his case together for this tournament to come to Riverhead. A tournament which the eastern end of Long Island has always participated in in assembling all stars from all over the eastern end.

So, we're hopefully going to get it and this Resolution supports

Councilman Prusinowski: "Don't let it happen again."

Councilman Prusinowski: "All right. So I'm going to move that Resolution as whatever they did to it right now."

Councilwoman Gilliam: "They didn't do anything to it."

Deputy Supervisor Stark: "You've got to move the Resolution that was submitted to the Town Clerk."

Councilman Prusinowski: "Right."

Deputy Supervisor Stark: "Which approves the site plan of Okeanos."

Councilman Prusinowski: "Right."

Deputy Supervisor Stark: "That motion is seconded. Moved and seconded."

Barbara Grattan: "Now we're calling this vote?"

Councilman Prusinowski: "Right."

Deputy Supervisor Stark: "Yes, please."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Resolution #712

Deputy Supervisor Stark: "Authorizes the publication of notice to bidders for Suffolk Theatre roof repairs. So moved."

Councilman Prusinowski: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

improvement of lands as part of the plan. We had talked about that?"

Councilman Prusinowski: "Yeah, the parking of the buses."

Councilwoman Gilliam: "The phrase that the plan would discuss use and improvement of land."

Councilman Prusinowski: "I know, you're right, Jim. You're right. Exactly, you're right. Normally we could hold off but everybody wants this done so we can have a building permit."

Rick Hanley: "Okay. So you're troubled by this phrase?"

Councilwoman Gilliam: "Phrase, improvement of the land, for the reasons we discussed about suggesting-- "

Councilman Prusinowski: "And now we pause for a commercial from our local sponsor."

Rick Hanley: "This is the-- this portion of the paragraph deals with the area to be improved-- "

Councilwoman Gilliam: "Okay. So you're not talking about-- "

Rick Hanley: "I'm not talking about the bus (inaudible) over here. Part of the paragraph that deals with that is-- special plans to (inaudible) for location of land (inaudible) outside of the existing Parking District (inaudible) lands held in private ownership. (inaudible)."

Councilman Creighton: "It gives the Town location approval, right?"

Rick Hanley: "Right. Plan and location."

Councilman Creighton: "That was the issue."

Councilwoman Gilliam: "Okay."

Rick Hanley: "I apologize to you, Mr. Stark."

Councilman Creighton: "How about me?"

Councilwoman Gilliam: "I would like to see the amendment."

Deputy Supervisor Stark: "I asked you to put that on their desks prior to the meeting."

Councilman Prusinowski: "She did. But we saw it this afternoon when-- "

Councilwoman Gilliam: "Well, in all fairness we talked about language but I didn't see the actual written version."

Councilman Prusinowski: "Oh, yeah, right. No, you're right. I'm saying we saw the map of the site plan."

Rick Hanley: "It's item 14, Harriet, maybe not, maybe that's the other one. I think it's 14. I rewrote that."

Councilman Prusinowski: "It had to do with the improvements to the public property next to the entrance, right?"

Deputy Supervisor Stark: "Nobody believes me."

Rick Hanley: "Right."

Councilman Prusinowski: "What? About what?"

Deputy Supervisor Stark: "I told them to rewrite it, and have it on everybody's desk prior to the meeting so they could go over it in case they had a question on it and save time and-- "

Councilman Prusinowski: "Right. I also directed that no Resolution be accepted in the Town Clerk's Office after 12:00 noon."

Councilman Prusinowski: "I agree with you. But-- "

Deputy Supervisor Stark: "Now we're up to two."

Councilman Prusinowski: "Well, apparently, they want this done tonight so they can get a building permit tomorrow, so-- "

Councilwoman Gilliam: "Well, actually there was a question that is still in here about I had raised a question about using the term

that and we've asked for Resolutions to come out of the Chamber, BID, and Merchants Division and our service clubs. So I move this Resolution."

Councilman Prusinowski: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Resolution #717

Barbara Grattan: "Councilman Creighton."

Deputy Supervisor Stark: "No, we have done that."

Resolution #717

Councilman Creighton: "This authorizes the Supervisor to establish a budget adjustment. So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Resolution #718

Councilwoman Gilliam: "Authorizes the Supervisor to establish a budget in the Water District. So moved."

Councilman Creighton: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #719

Councilman Prusinowski: "General Town budget adjustment. So moved."

Deputy Supervisor Stark: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #720

Deputy Supervisor Stark: "This is a budget adjustment in the Suffolk Theatre appropriation line. So moved."

Councilman Prusinowski: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. Resolution is adopted.

Resolution #721

Councilman Creighton: "This authorizes the Town Clerk to publish and post notice of Public Hearing regarding the special permit of Edward Broidy. So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Prusinowski, yes; Stark, yes. The Resolution is adopted.

Deputy Supervisor Stark: "Is there a motion to pay the bills?"

Councilman Prusinowski: "So moved. We have two more. I've got to do the bulkhead."

Deputy Supervisor Stark: "Let's get the bills paid for."

Councilman Prusinowski: "So moved."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Creighton, yes; Gilliam, yes; Prusinowski, yes; Stark, yes. The Resolution to pay bills is adopted.

Councilman Prusinowski: "I'd like to make a motion to award a bid to James H. Rambo, Inc. in the amount of \$69,132 for the repair and construction of a-- reconstruction of a bulkheading project at the head of Meetinghouse Creek."

I would like to point out to the public that we're doing this bulkhead in recycled plastic. It's one of our first projects in Town using recycled timber. I don't have a Resolution, I have this and they're going to type it up for you later tomorrow morning, okay? So I make this motion. So moved."

Councilwoman Gilliam: "And seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes.

Councilman Creighton: "I think we should note that this is a joint project with the Town and Townscape who's contributing almost 50% of the money for this. Yes."

The Vote (Cont'd.): Prusinowski, yes; Stark?

Deputy Supervisor Stark: "Plus I think some monies are coming out of our Recreation-- "

Councilman Prusinowski: "The balance, \$9,000."

Deputy Supervisor Stark: "Yes."

The Vote (Cont'd.): "Okay. Resolution is adopted.

Councilman Prusinowski: "And the final Resolution is authorize

release of Riverhead Town house numbers. So moved."

Deputy Supervisor Stark: "Seconded."

Deputy Supervisor Stark: "Moved and seconded."

The Vote: Gilliam, yes; Creighton, yes; Stark, yes; Prusinowski, yes. The Resolution is adopted.

Deputy Supervisor Stark: "Without objection, this meeting is adjourned."

Meeting adjourned: 9:25 p.m.

Barbara G. Stanton
Town Clerk
